

Enwa RO Water Makers
**Reliable Water
Production**

A Complete Range of Freshwater Makers

Standard capacities from 1.8 to 200 m³ / day

- ◆ Leading-edge membrane design
- ◆ Customised and flexible solutions
- ◆ Scandinavian quality
- ◆ High-standard internal components from leading suppliers

More Than 40 Years of Experience

Enwa develops and delivers energy-efficient and environmentally friendly water treatment systems and is one of Scandinavia's leading companies in this field. Safe drinking water, clean process water, corrosion prevention, and energy efficiency are some of the areas where our expertise and products add value for our customers.

A Quality Solution to Meet Your Needs

Reliable Solutions with Proven Performance

Complete Range

Enwa offers a wide range of standard reverse osmosis freshwater makers, from compact, space-saving solutions to large-capacity units designed to meet your needs. Engineered for reliable operation, high efficiency, and long service life, our systems deliver consistent performance even under demanding conditions.

Built to Last

Built on Scandinavian quality standards and equipped with components from leading suppliers, every unit provides dependable operation you can trust. We have installations that have been running for over 40 years — a testament to Enwa's quality and durability.

Guaranteed Performance & Energy Savings

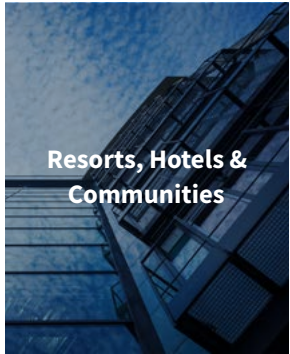

Our standard models offer capacities from 1.8 to 200 m³/day, with guaranteed production performance — we deliver what we promise. For units of 100 m³/day and above, the optional iSaver energy recovery system can reduce power consumption by up to 40%, lowering operating costs and supporting sustainable operation.

Certified Quality

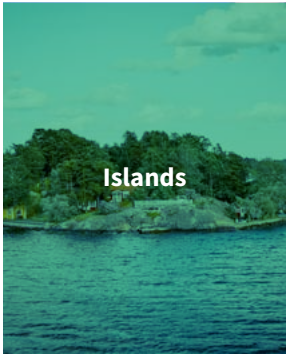

All Enwa RO units are CE marked in accordance with the Machinery Directive 2006/42/EC, ensuring compliance with strict safety and quality standards.

When you choose Enwa, you get more than just equipment – you get a solution that works, year after year.

We Can Do It All

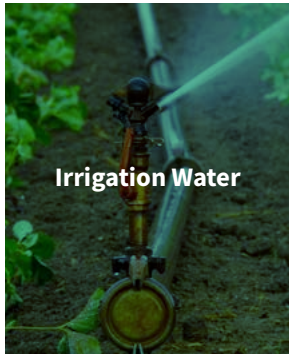

Resorts, Hotels & Communities

Islands

Municipal Water Supply

Irrigation Water

Closed-Loop Heating & Cooling Systems

Food & Beverage Production

Healthcare & Hospitals

Power & Energy

Aquaculture & Fisheries

Always by Your Side

Global Service & Support You Can Trust

Wherever you are, Enwa is ready to support you. Our worldwide service network, certified partners, and highly trained

technicians ensure that your freshwater maker continues to deliver reliable performance throughout its lifetime.

Worldwide Service

Our global service network ensures support wherever you operate.

Aftersales Network

Certified partners provide reliable maintenance and spare parts.

Trained Technicians

All service personnel are trained and certified by Enwa.

Certified Standards

Compliant with NS-EN ISO 9001:2015 and NS-EN ISO 14001:2015.

Selection of Standard Desalination Products

MT-1800 – 6000

	MT-1800	MT-3200	MT-4500	MT-5500	MT-6000
Capacity (m ³ /day)	1.8	3.2	4.5	5.5	6.0
Membranes (2.5")	1 pcs	2 pcs	3 pcs	4 pcs	5 pcs

SW 15T – 37T

	15T	20T	30T	37T
Capacity (m ³ /day)	15	20	30	37
Membranes (4")	4 pcs	6 pcs	8 pcs	10 pcs

MT-50 – 200

	MT-50	SW-75	SW-100	MT-150	MT-200
Capacity (m ³ /day)	50	75	100	150	200
Membranes (8")	3 pcs	4 pcs	6 pcs	8 pcs	12 pcs

Adapted Products

Systems for Brackish Water

Our systems for brackish water produce clean, safe drinking water perfectly suited for the Baltic Sea and other areas with naturally brackish conditions. Enwa's reverse osmosis solutions handle fluctuating salinity with ease, delivering reliable performance and consistent water quality.

Systems for Technical Water – Beyond Drinking Quality

For applications that demand water purity beyond drinking water standards, Enwa offers advanced RO solutions. We deliver high-quality technical water for industries, hospitals, and other sensitive operations.

Pre- and Post-Treatment Solutions

We provide complete solutions for raw water pre-treatment to ensure optimal feed water quality for desalination. This includes ultrafiltration, sand and carbon filtration, and softening systems.

Post-treatment is equally important — Enwa offers remineralisation solutions to restore pH and alkalinity, using mineral filters and optional CO₂ dosing to ensure safe drinking water.

Enwa is part of the EnviroWater Group,
a network of companies with experts in
sustainable water preparation and treatment.
