## About Hurtigruten

### **A Norwegian Icon on the Coastal Route**

Hurtigruten ASA operates Norway's legendary coastal voyage between Bergen and Kirkenes — a route that has connected local communities and travelers for over a century. The company combines passenger transport, cargo, and expedition cruises along one of the world's most scenic coastlines.

## Our Delivery – EnwaMatic®

### **Reliable HVAC Operation**

Since 2002, Hurtigruten has relied on EnwaMatic Maritime technology to ensure efficient, chemical-free water treatment in its HVAC systems. Over nearly two decades, the patented EnwaMatic solution has protected onboard cooling and heating circuits from corrosion, scaling, and fouling — providing long-term stability and reduced maintenance needs.

### **Proven Across the Fleet**

Enwa has delivered EnwaMatic® Maritime units to several vessels in Hurtigruten's fleet, including MS Spitsbergen, MS Fridtjof Nansen, MS Roald Amundsen, MS Midnatsol, MS Nordly, MS Polarlys, MS Fram, MS Otto Sverdrup and MS Trollfjord. Each installation has contributed to reliable operation, improved system efficiency, and reduced environmental footprint — fully aligned with Hurtigruten's sustainability ambitions.

## Hurtigruten – Norway

---

### **A Growing Demand in the Cruise Industry**

The success of EnwaMatic on Hurtigruten's ships reflects a broader trend across the cruise industry. Chemical-free water treatment is now a preferred solution for HVAC and cooling systems on vessels operated by major cruise lines such as Havila Kystruten, TUI Cruises, Royal Caribbean Cruise Lines (RCCL), Silversea Cruises, and The Ritz-Carlton Yacht Collection.

### **Cleaner Water, Safer Systems, Greener Voyages**

With EnwaMatic, Hurtigruten has secured reliable HVAC performance while supporting its commitment to sustainable and environmentally responsible operations — proving that even at sea, clean water matters.
